

**REMARKS**

The Specification has been amended on page 1, following the Title, to reference the parent application. The instant application is a divisional of said parent.

Included for the Examiner's reference and convenience is a copy of the Information Disclosure Statement filed with the parent application. Copies of any documents listed thereon will be promptly and gladly provided upon request.

Claims 1-17, being addressed in the parent application, have been cancelled. The remaining claims 18-21 were withdrawn from the parent application and are now the subject of this divisional. These claims are identified as "original." Any newly added claims are identified herein as "new."

Applicants also respectfully submit that none of the documents of record in the parent application teach or suggest the invention claimed in this divisional.

A check for \$770.00, payable to the Commissioner of Patents, is included herewith to cover the filing fee for the new application. This fee is also shown on the Transmittal which accompanies this response.

Respectfully submitted,

By Lawrence R. Fraley
